

## Regional commitment through donation in kind

Würzburg, 27.04.2022. WEGMANN automotive donates products from its portfolio to the Don Bosco vocational school in Würzburg.

A donation in kind in the amount of 500 euros was handed over on Wednesday, 27.04.2022 by Dominik Hoppe, Head of Key Account Management (WEGMANN automotive).

The Don Bosco vocational school was pleased to receive a variety of products from the WEGMANN automotive product range. The donation in kind included products from the WEGMANN automotive portfolio such as adhesive and impact weights, a SPEEDCUT with stand, tools such as valve removers and scrapers for adhesive weights, TPMS sensors with matching programmers and valves. The products are the perfect complement for the school, which recently acquired a balancing machine. This will be used to explain to the trainees all the topics relating wheel changes. With the help of practical application, the students are optimally prepared for their later working life and can implement and practice their learned knowledge in school on products with OE quality.

The Don Bosco Vocational School Würzburg, as a vocational school for special educational support, provides disadvantaged young people with special educational needs with vocational qualifications. The aim of this work is to enable young people to participate in the process of vocational training and later to enter working life. At present, 550 students attend the Don Bosco Vocational School, of which 4 to 12 students each year learn an apprenticeship in the field of motor vehicles. In addition to the theoretical education of the school, the students usually have an external internship or a training company, in which they learn practical subjects. Nevertheless, the Don Bosco Vocational School is equipped with its own workshop and several vehicles.

The donation was handed over to Mrs. Frohnappel, who has been a specialist teacher for vocational schools for 14 years and has a master motor vehicle title. All teachers at the Don Bosco Vocational School have additional special education training in order to provide the students with the best possible education. The school offer many different training professions.

The photo shows students from the 1st year of apprenticeship with the apprenticeship professions of automotive mechatronics specialist and commercial vehicle mechatronics specialist. Also to be seen is Mrs. Frohnapfel (from the Don-Bosco vocational school), Mr. Genheimer (from the Don-Bosco vocational school), as well as Mr. Dominik Hoppe (from WEGMANN automotive). We would like to thank Mrs. Frohnapfel and wish good luck with our OE products!

We would like to thank Ms. Frohnapfel and wish her every success in work with our OE products.
